DETAILED ACTION

Restriction / Election requirement of the application filed on 9/11/2003.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-30, 43-59**, drawn to a surgical apparatus, classified in class 606, subclass 213.
- II. Claims **31-42**, drawn to methods for stabilizing tissue, classified in class 128, subclass 898.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be performed with a materially different apparatus, e.g. an apparatus that does not have "a first contracted position and a second extended position."

A telephone call was made to Ronda Moore on June 7, 2006, to request an oral election to the above restriction requirement, but did not result in an election being made.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
